

AXICUBE

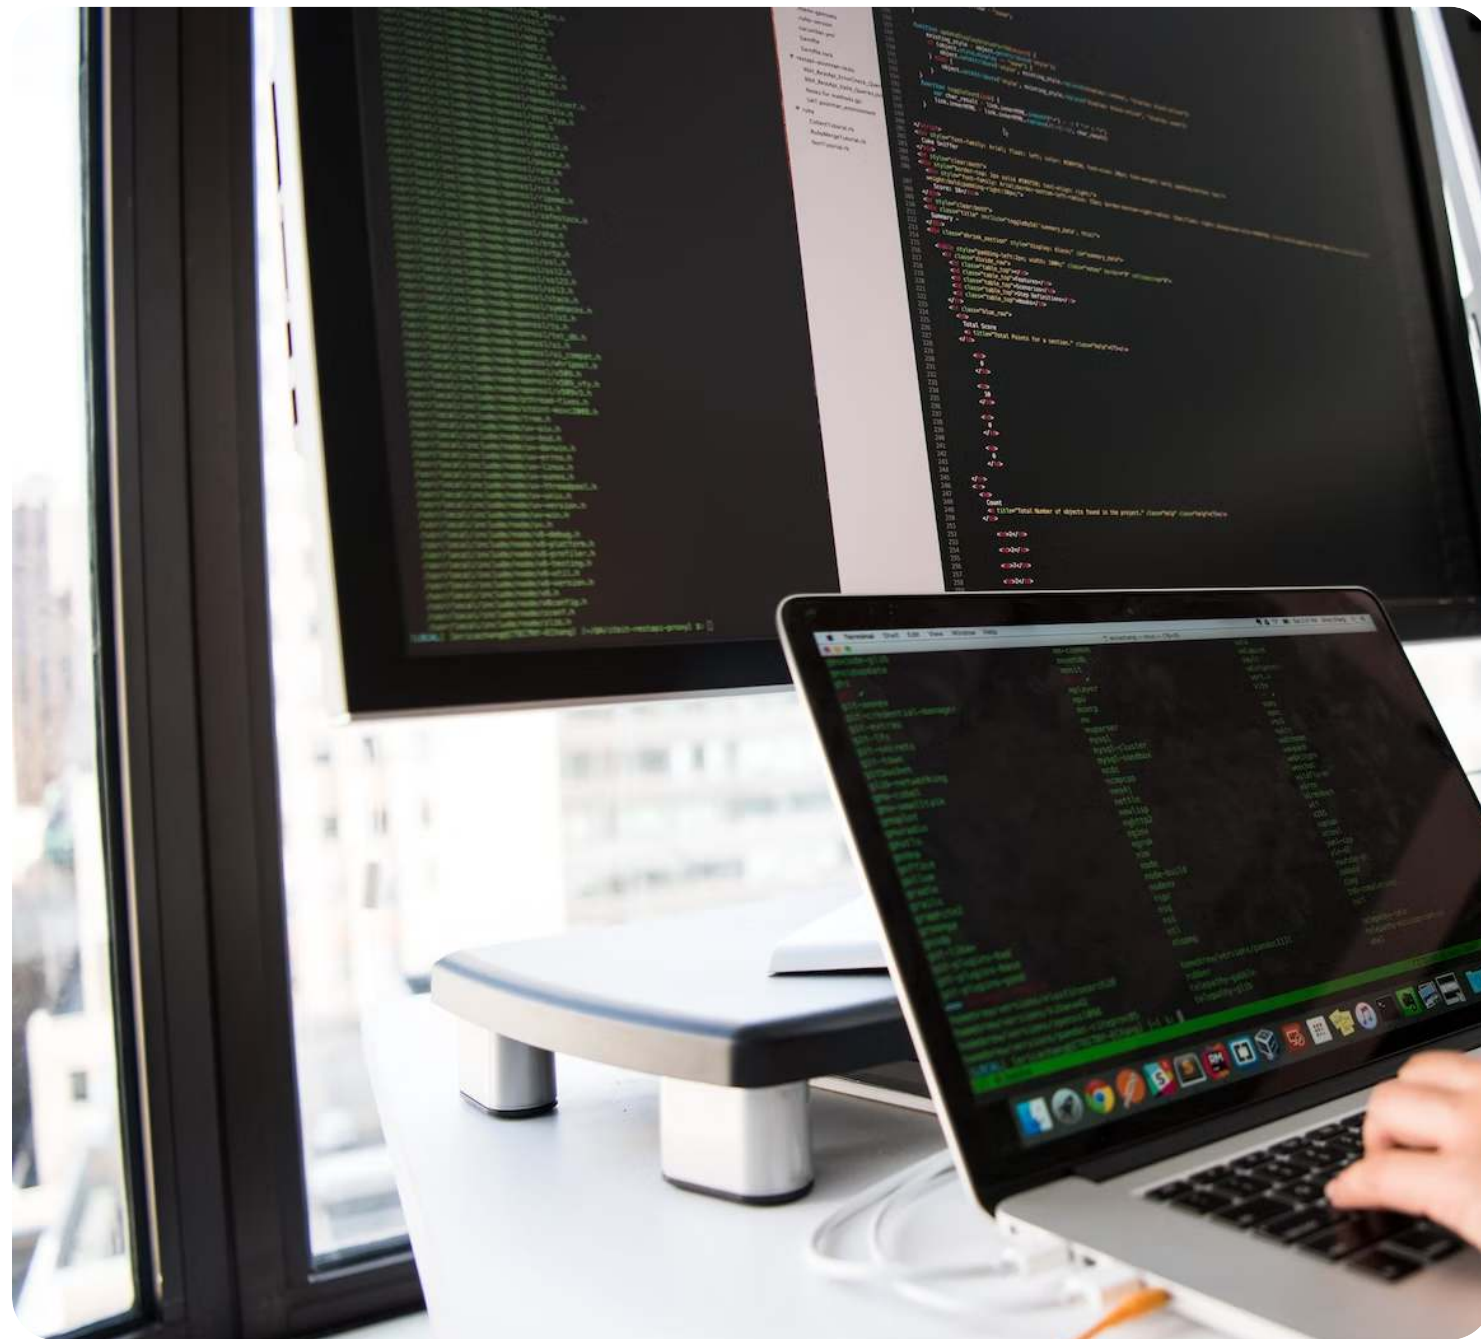

On-Demand UX/UI Design

Perfectly suits to Development Teams,
Fast and Growing Startups

WHOM CAN WE HELP?

Having completed over 37 projects for **Mobile and Web** in the past 3 years, we gained extensive experience of working **side-by-side with Developers**. Now we can bring the most value to our clients and be at your service if you are:

SOFTWARE DEVELOPMENT TEAMS

FAST & GROWING STARTUPS

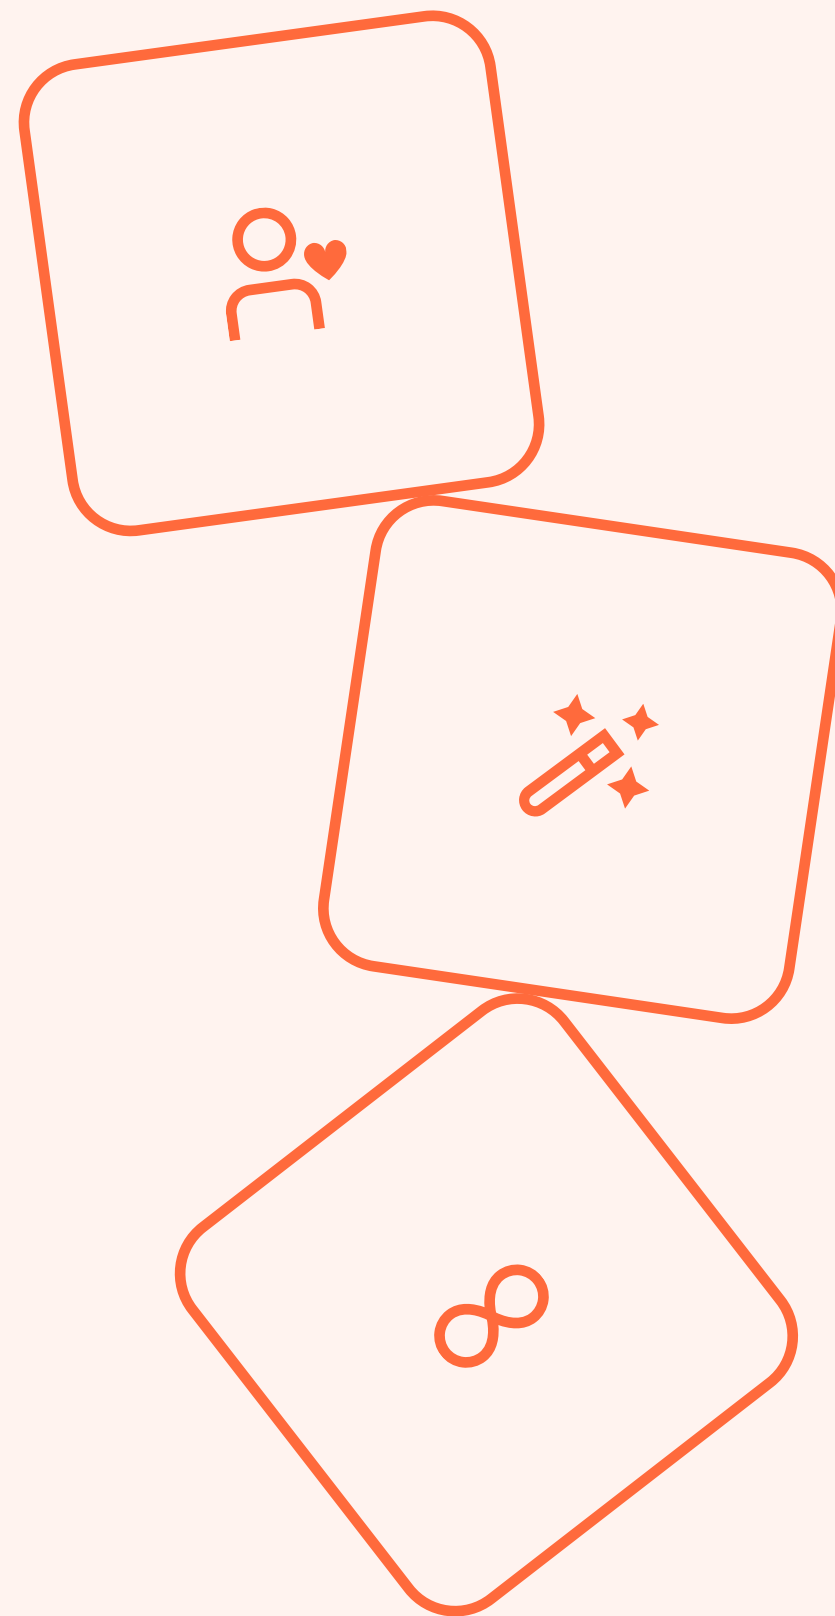

MARKETING AND CREATIVE AGENCIES

We know how to help your business grow

Axicube is a team of bright, creative people united by a common philosophy. We work to help businesses reveal their potential.

No micro-management

Forgot about micro-management, missed deadlines, and frustrating communication with freelancers. You give us a task – we give you a design solution. Design process organization, tools – it's all on us.

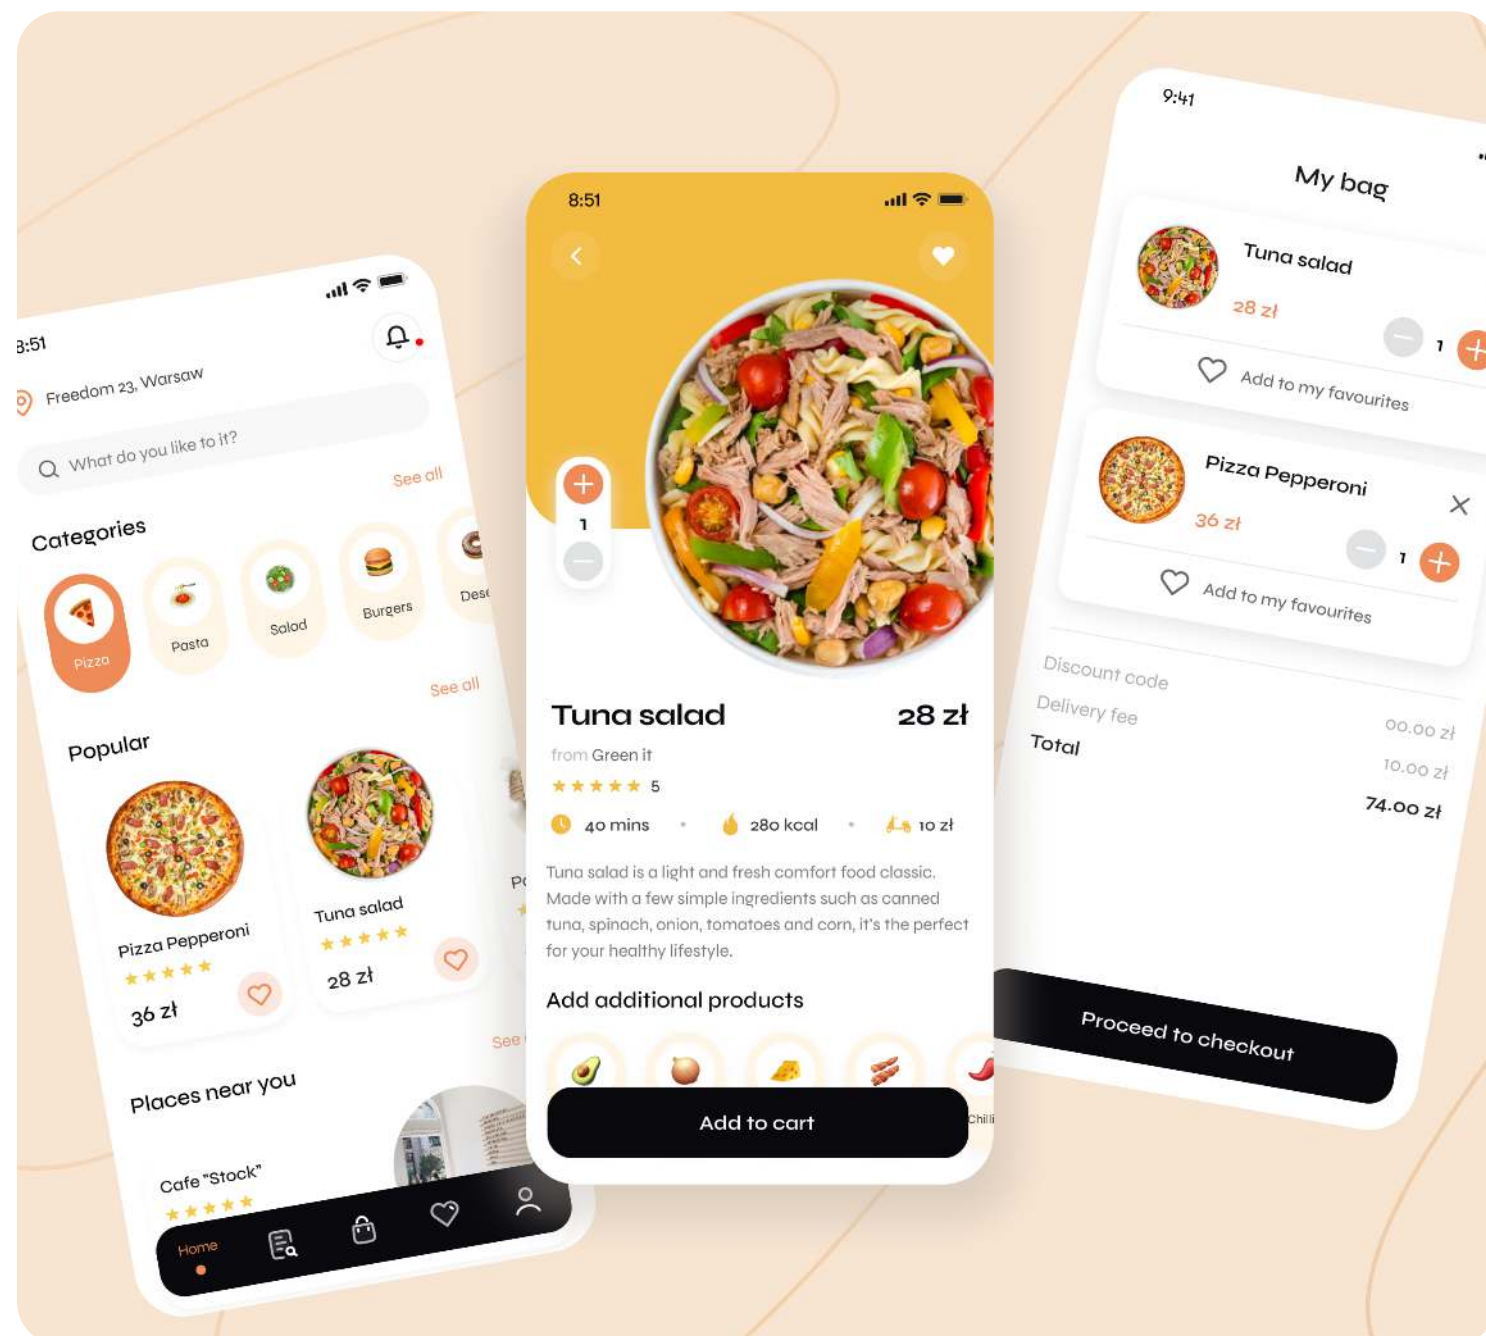

On-demand design support

We provide services only when you need them. There is no bench for the designers. So save your budget and pay only for the actual work.

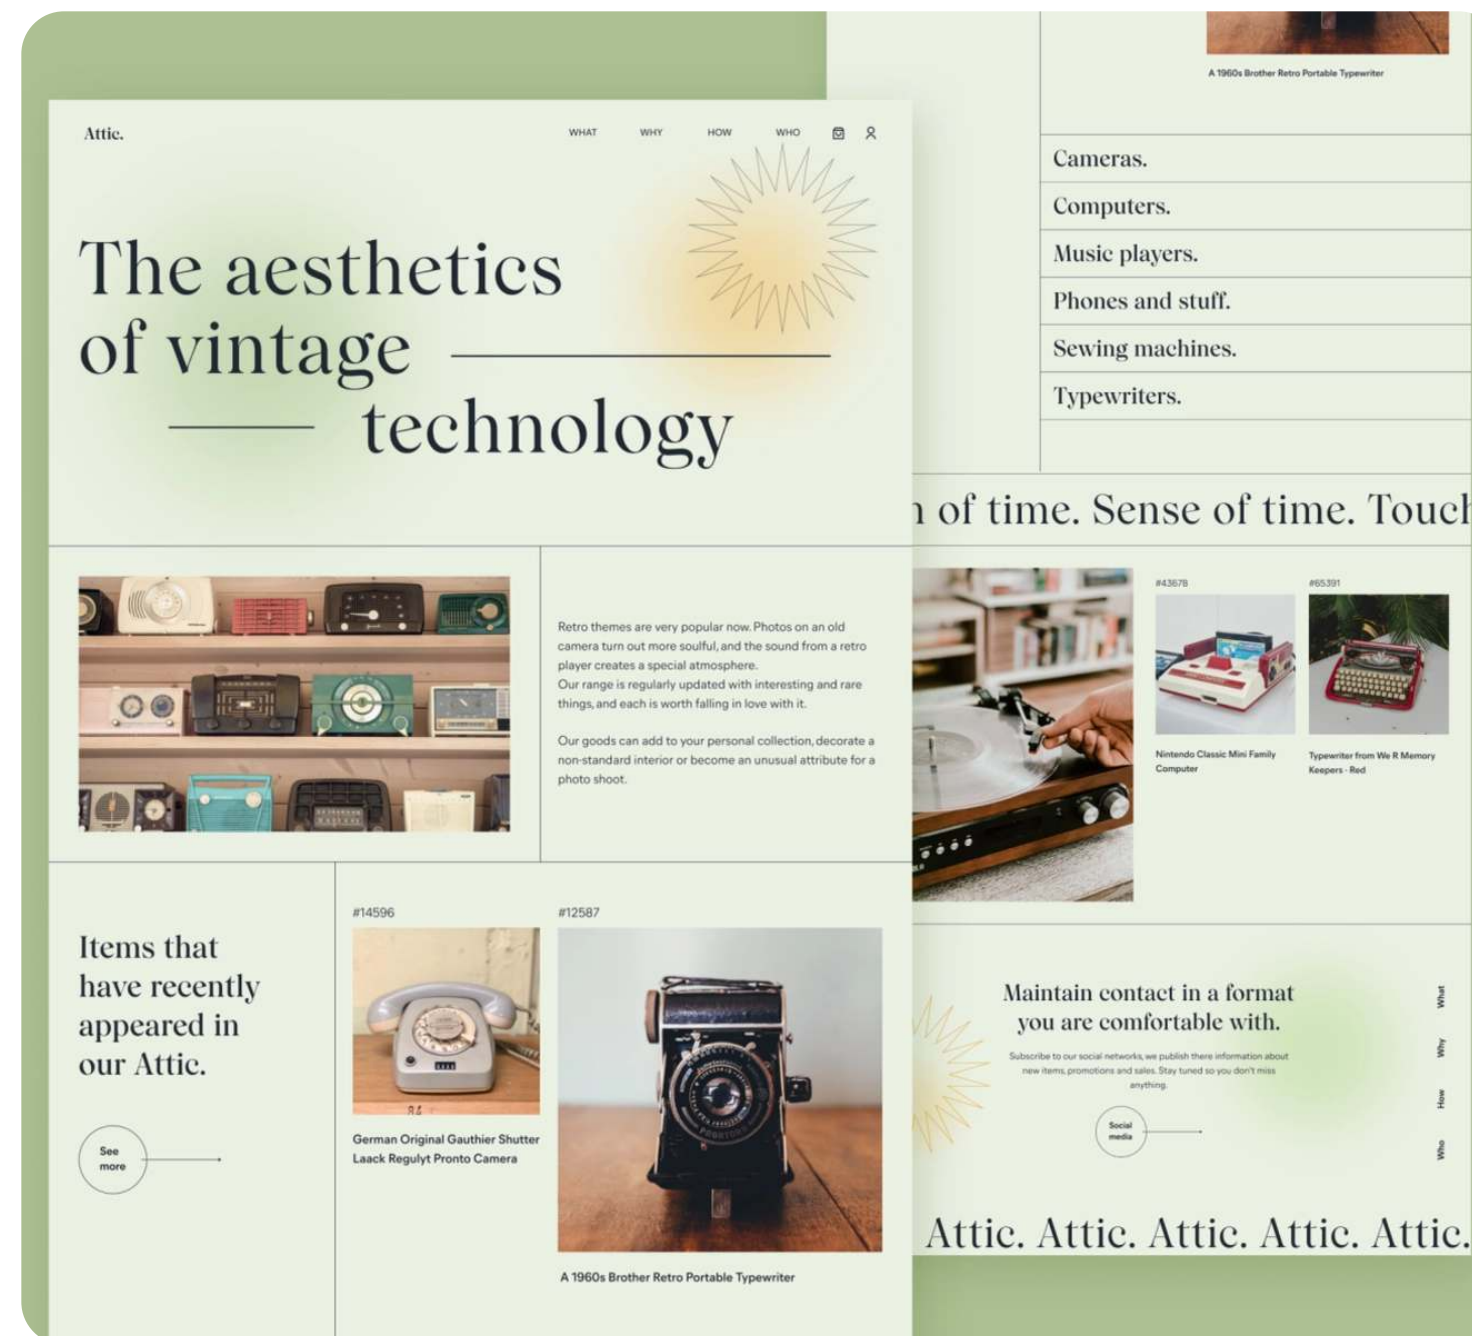

Ready-to-dev designs

The design meets the client's requirements without expanding the scope and budget. Your tech lead will be happy to have ready-to-dev and easy-to-implement mockups.

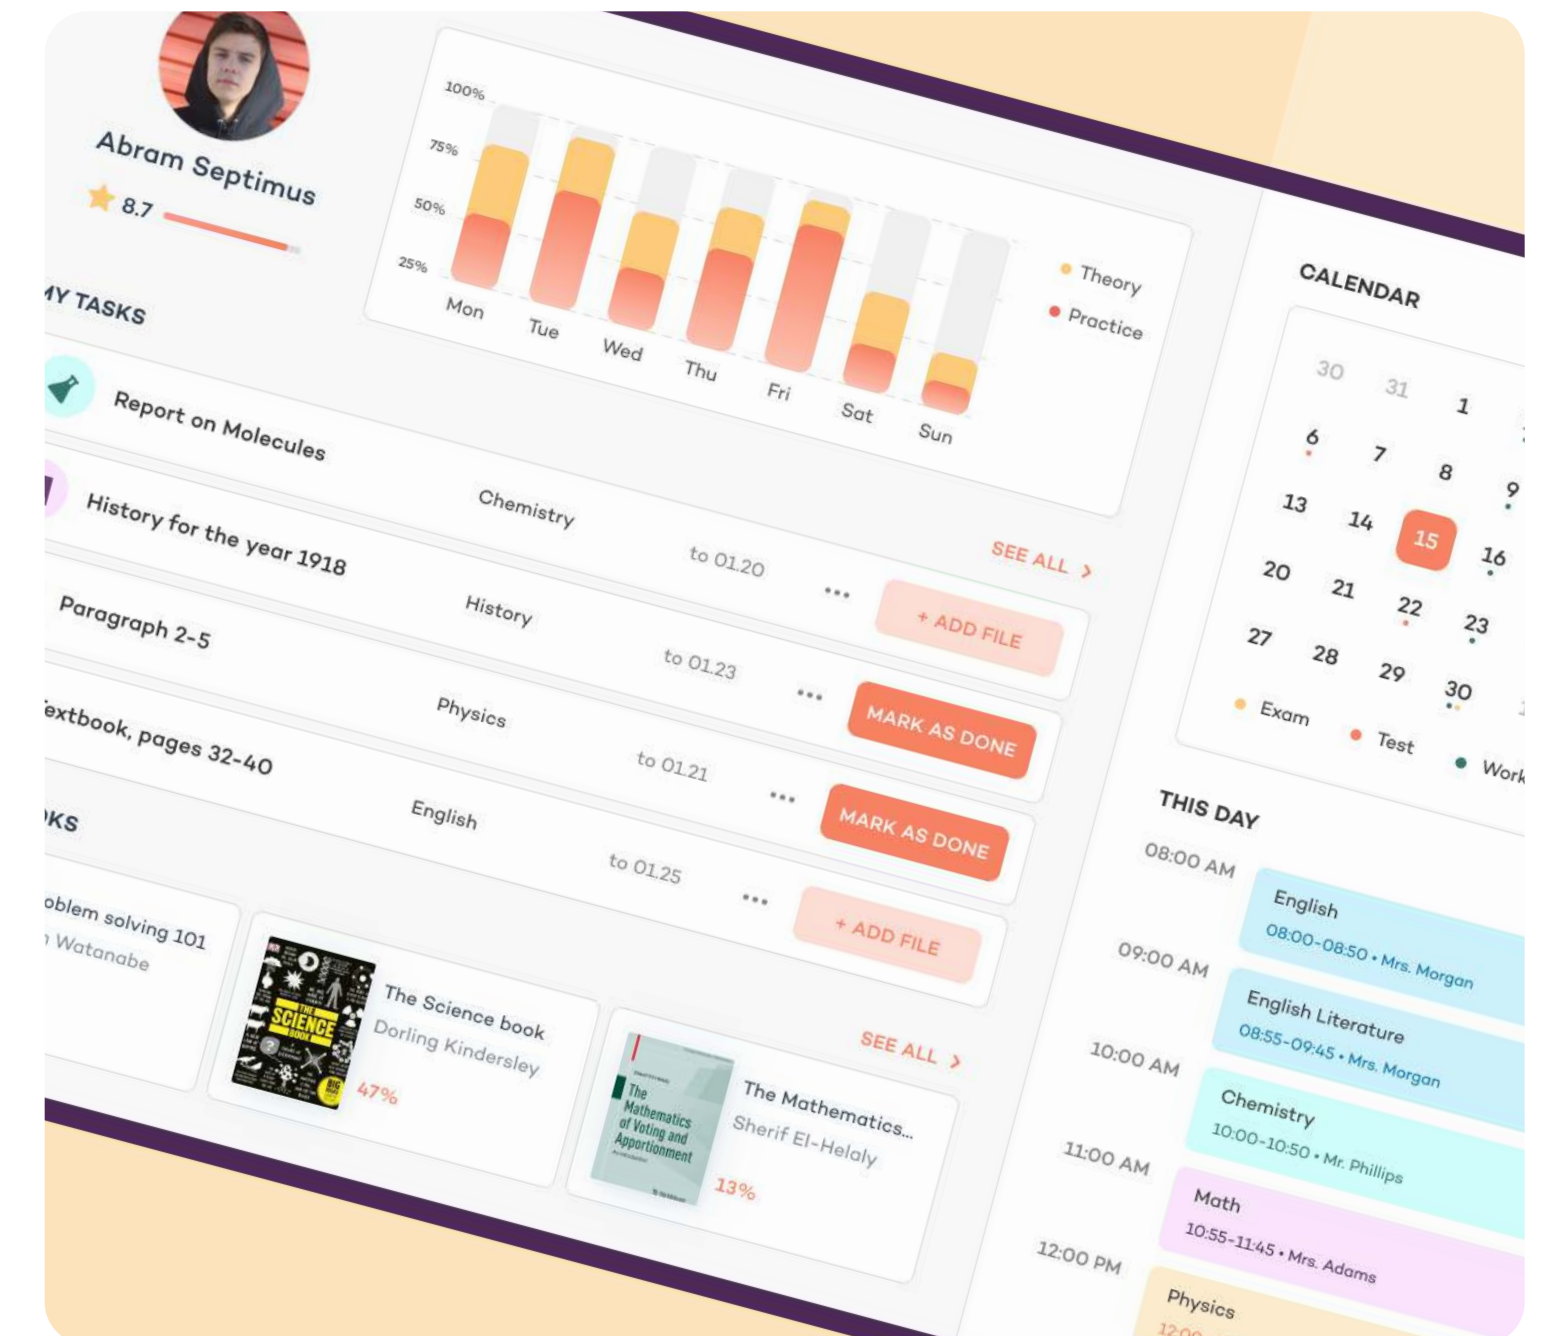

Brilliant in Assistance & On-Demand Design Support if you are working on:

Mobile App development (both native or cross-platform)

Web site and Landing Page development

Web Applications and Back Office production

YOUR COMANY

Norsk Guardian

Norsk Guardian is the app that provides a unique possibility to track your boat’s battery health and take care of your safety on the open water. From UX Research to UX design and building a scalable design system we have designed and supported Norsk Guardian during its development. Our team of PM, Design lead and Key UX designer cover all design needs, and together with developers released the app at Google Play and Apple Store.

Headquarters

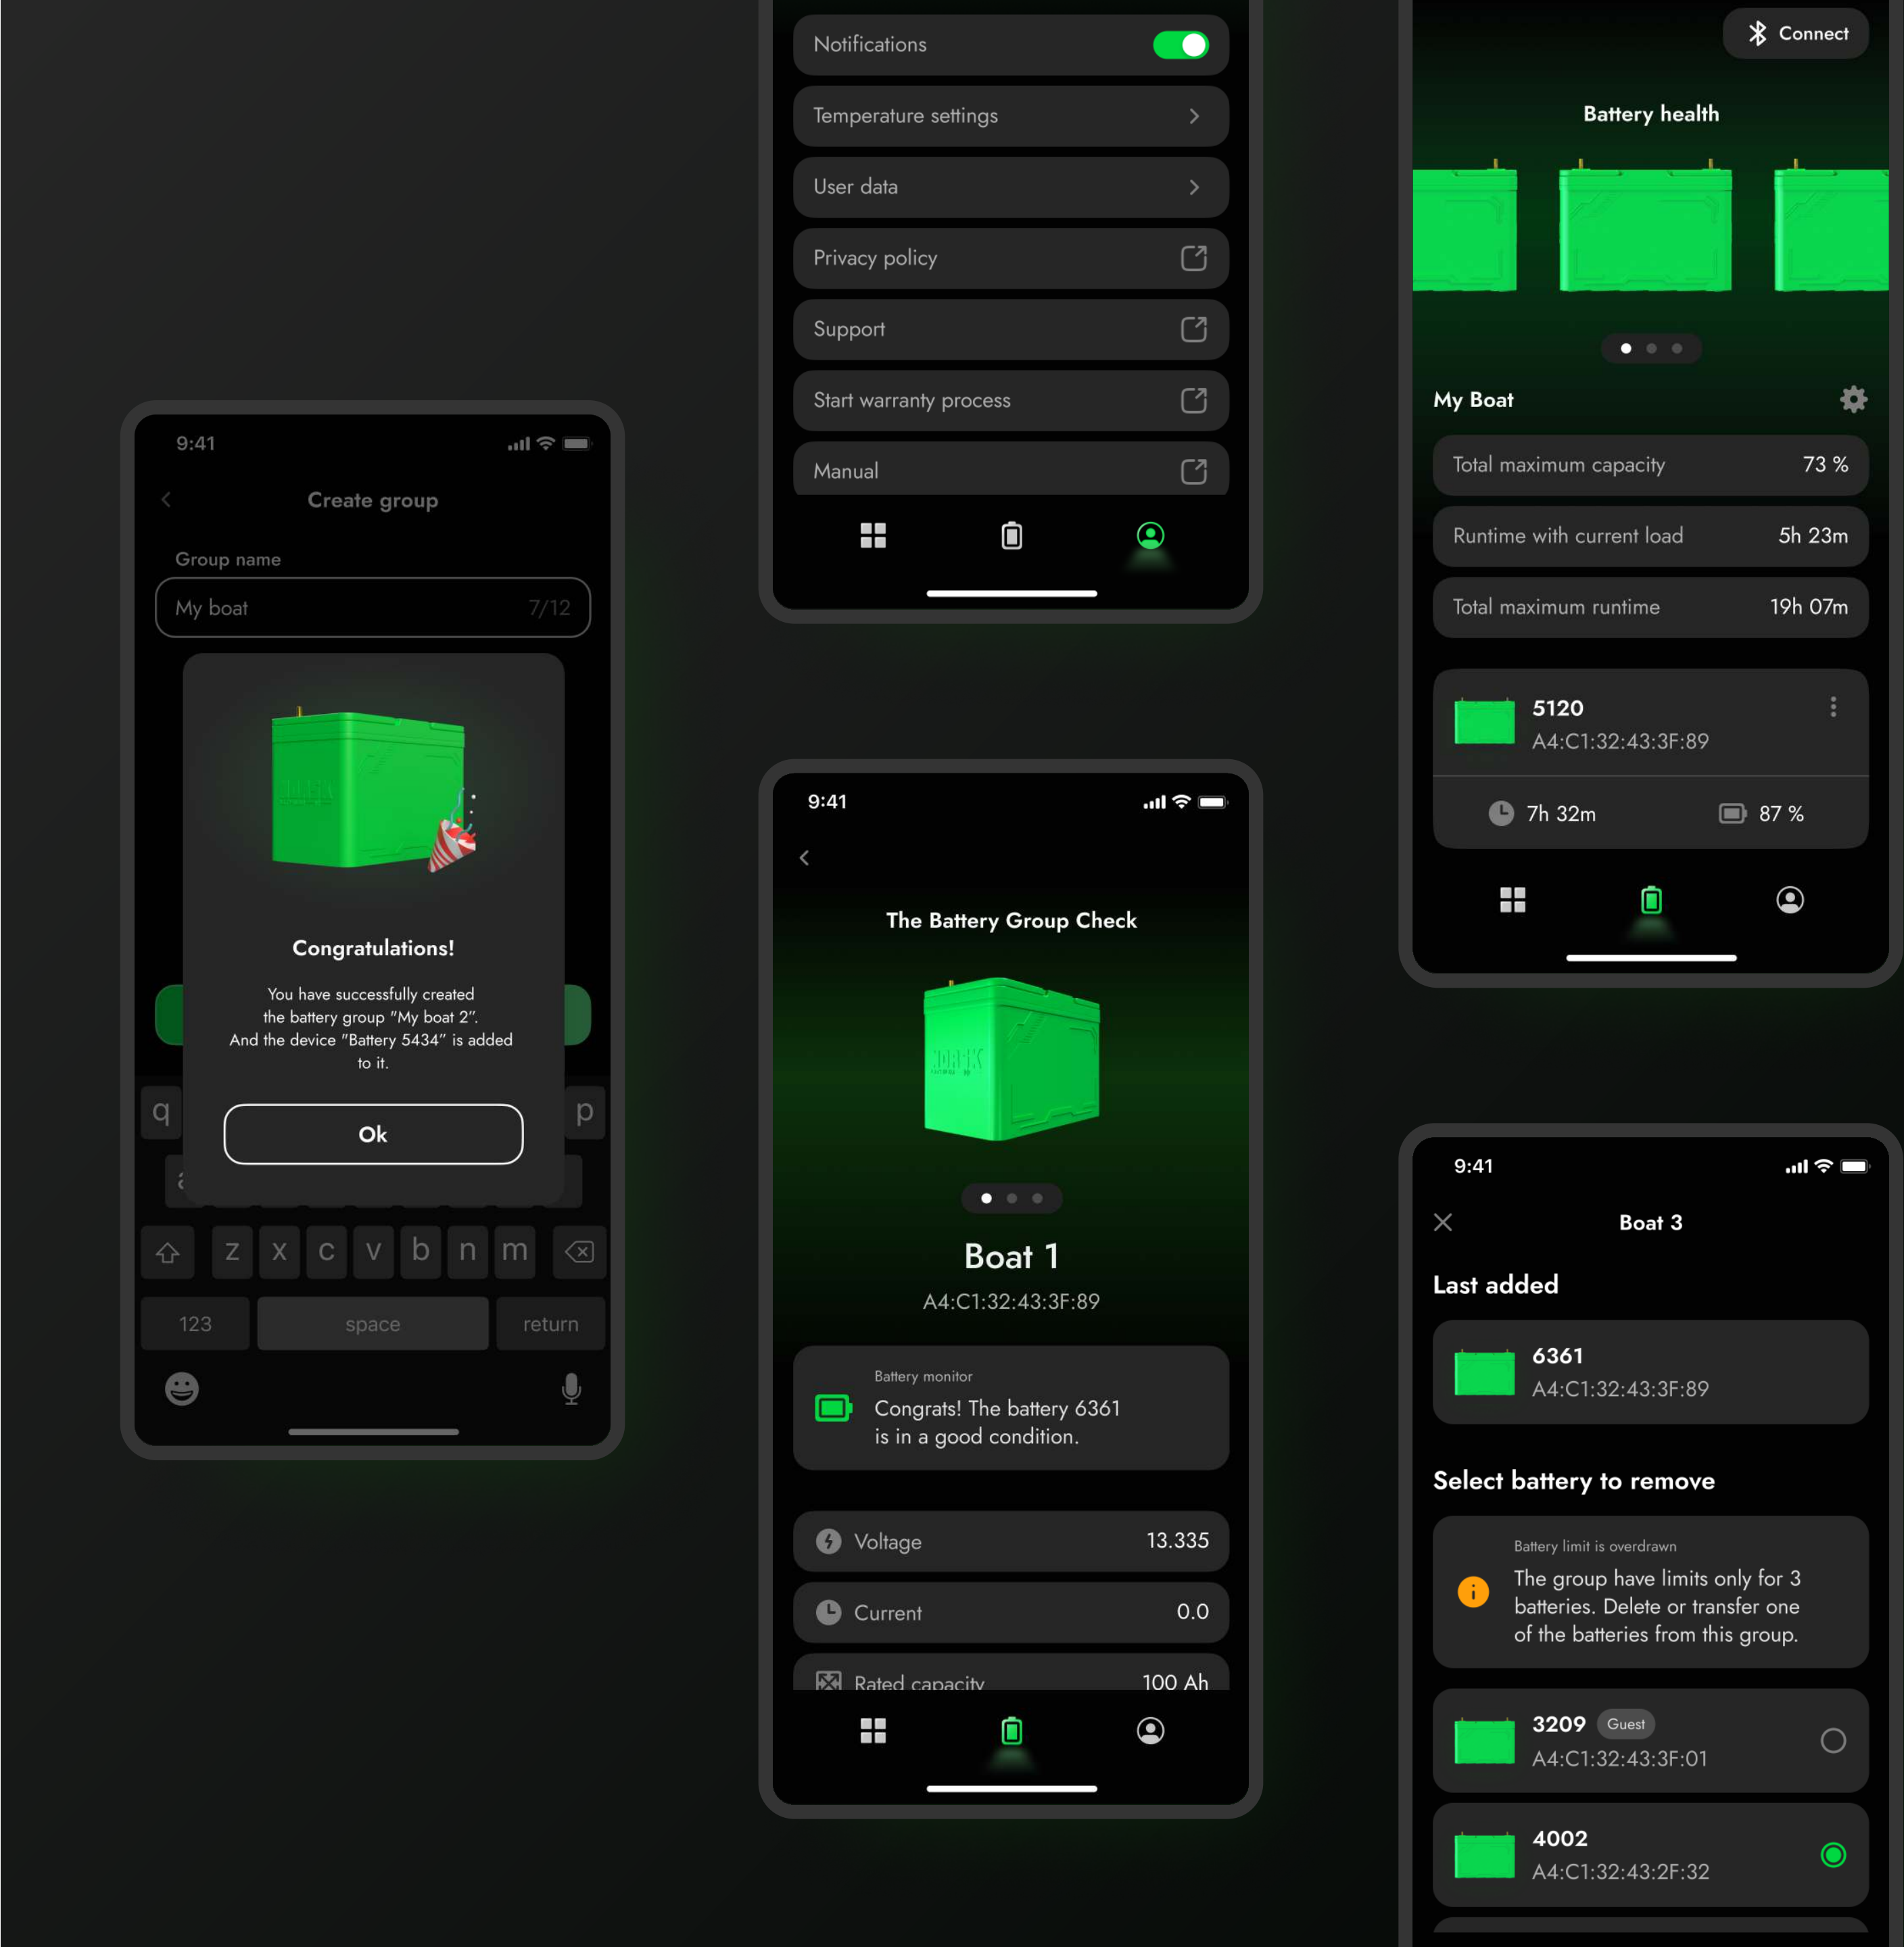

Minneapolis, MN, USA

Industry

Startup, IoT, BLE, Battery monitor

Services we provided

- User Flow
- UX design
- UI design
- Product design
- 3D modeling
- Motion design

Wand Education

We are creating a universal design system, quickly adopted for different visual styles (colors, fonts, styles of components). We have designed simple rules to make this design inclusive, responsive, and clean. Also, we have provided a simple no-code builder for activities and a tracking system. Thanks to this, 100k+ teachers could track the remote learning process.

Headquarters

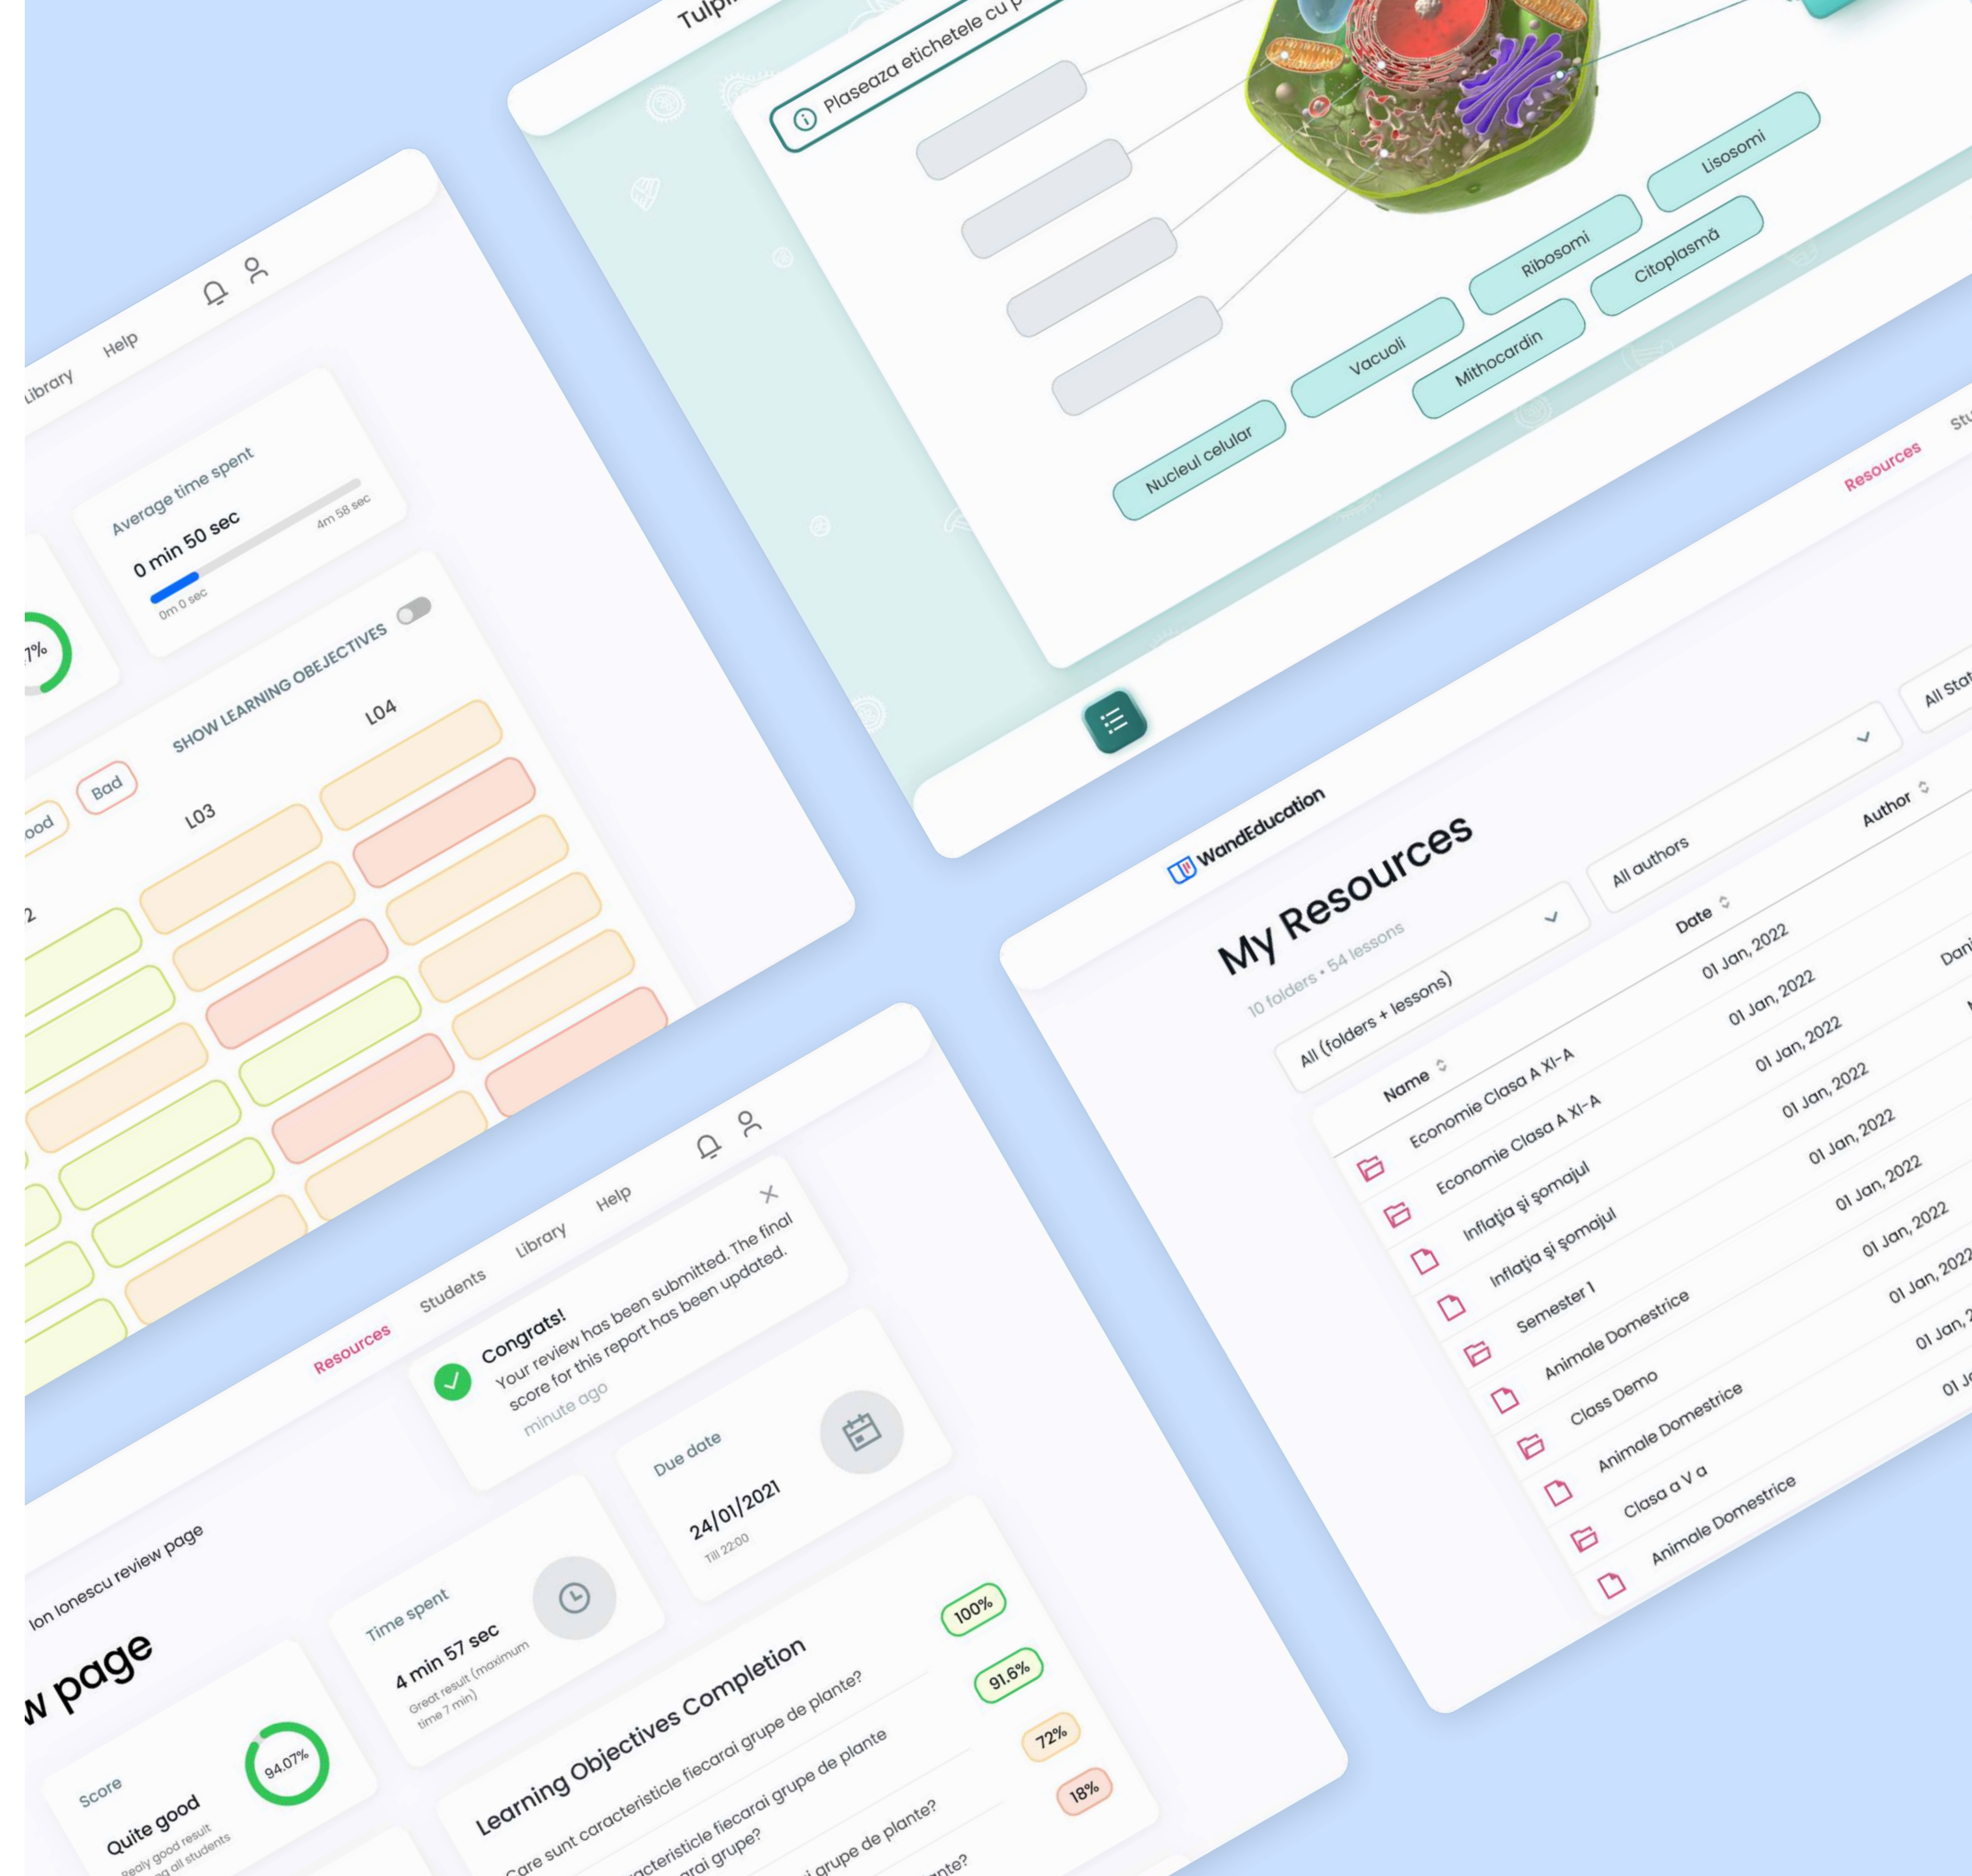

Bucharest, Romania

Industry

E-learning, Education

Services we provided

- Discovery Stage
- UX design
- UI design
- Design System
- Tech documentation
- Design Support
- Branding

SportPlus

We successfully developed a fitness application that fits perfectly into our client's brand ecosystem. The app is designed for both advanced users and beginners, offering personalized programs and tracking statistics. It allows multiple users to track their progress on a single piece of equipment, and easily switch between accounts. The app has helped our client increase conversion rates and customer loyalty, providing users with a better experience and making it easier for them to achieve their fitness goals.

Headquarters

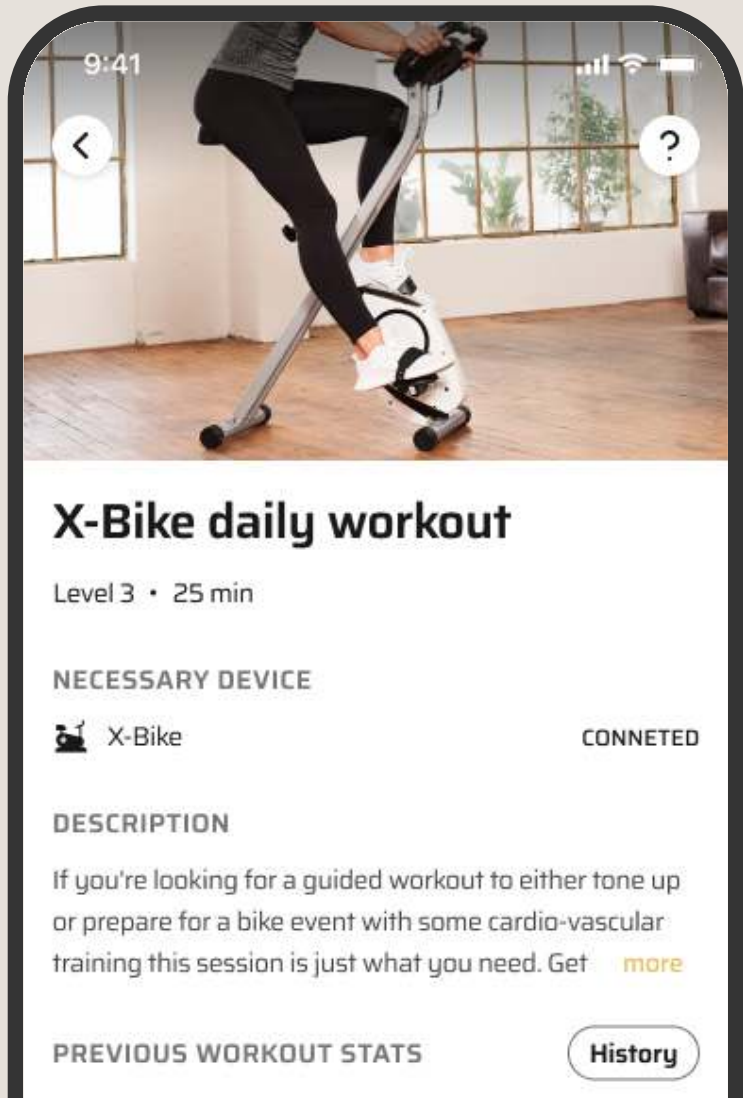

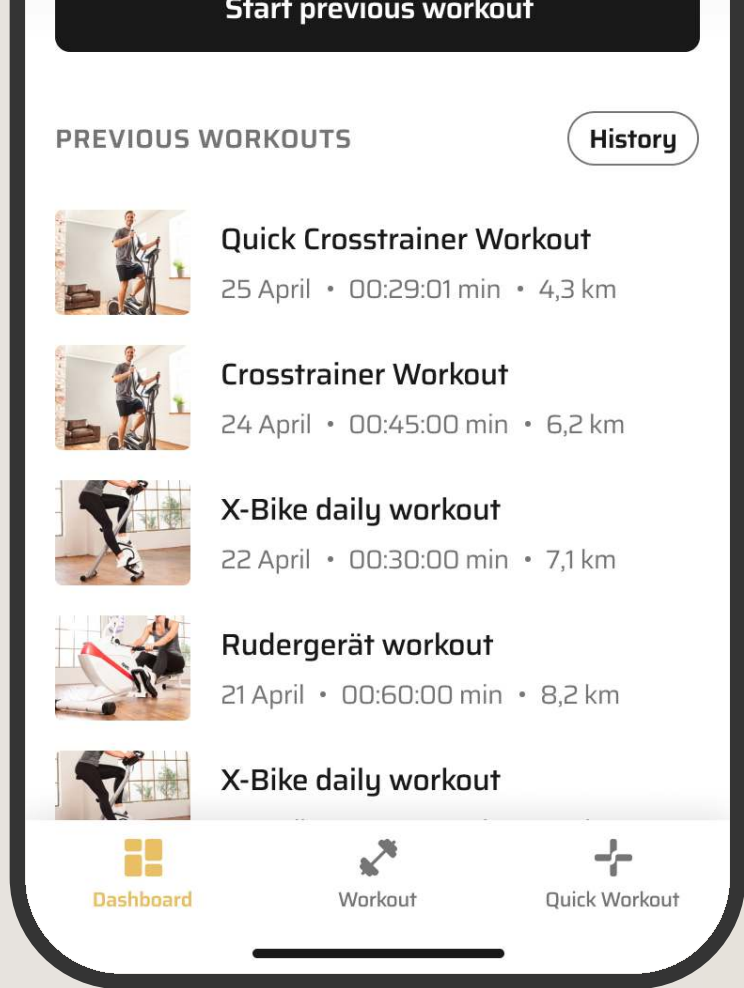

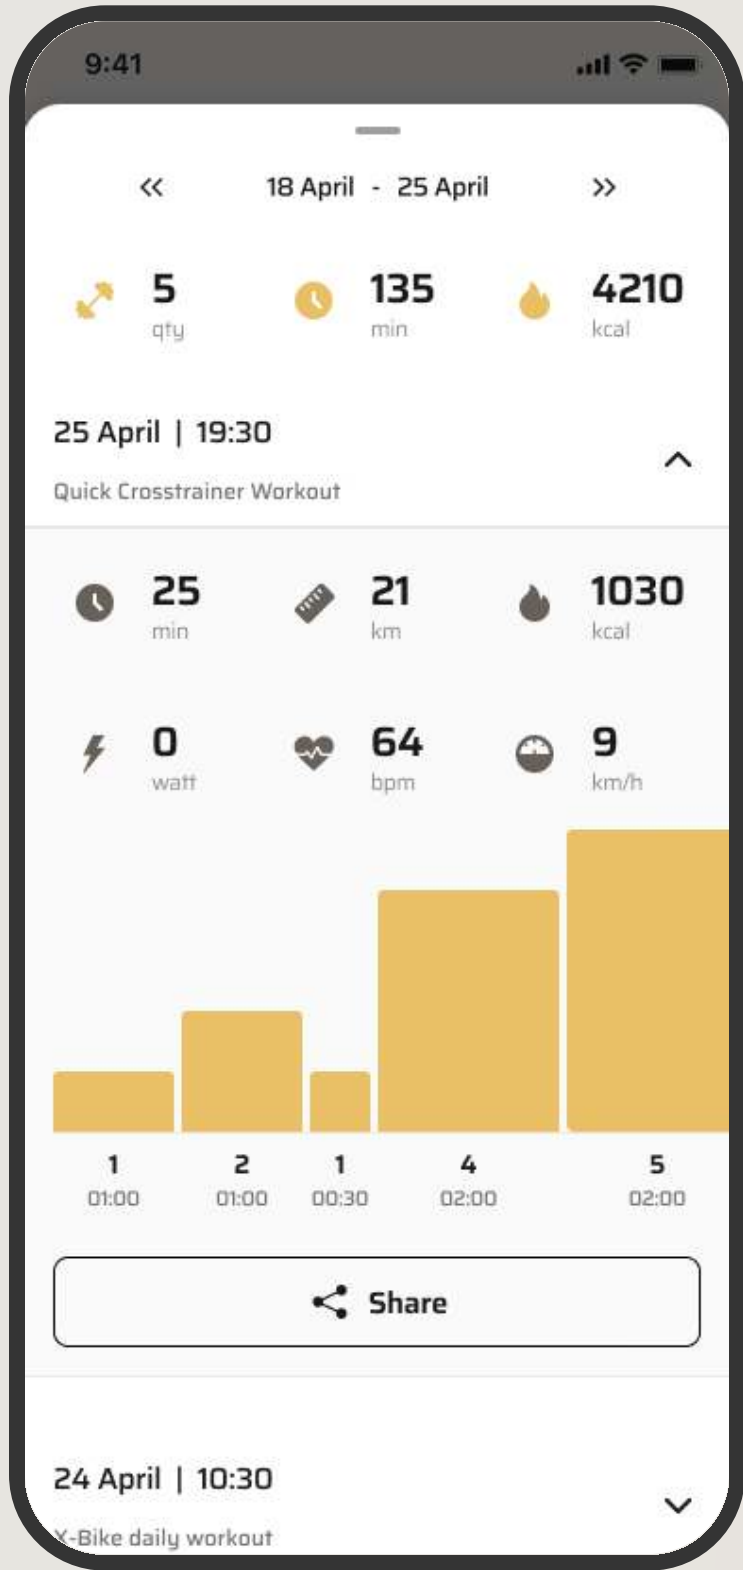

Hamburg, Germany

Industry

Fitness & Health, Home workout, BLE

Services we provided

- UX design
- UI design
- Design System

Completely

The main idea was to create a very comfortable workplace for copywriters. But in the end whether you're a business, startup, artist, or private person, this product is for everyone. It replaces many chats, emails, and additional task managers. Completely allows for collecting feedback and getting approval without any mess. Review a document > choose a status > add feedback. A simple and transparent system for everybody. We will divide our process into sprints and provides designs for developers on step-by-step basis.

Toronto, Canada

Industry

Task Manager, Chrome Extension, Project management

Services we provided

- UX design
- UI design
- Design System
- Design Support

Inner Belief

by Marisa Peer

We have designed an interface with a unique audio player focused on the uninterrupted hypnosis session. The user journey began from the market, with individual suggested tracks, to the daily scheduled session. We help to build a habit but not only listen to Marisa's tracks. For better visualisation of the app concept we have provided a clickable prototype and micro-interaction animation as a part of tech documentation.

Headquarters

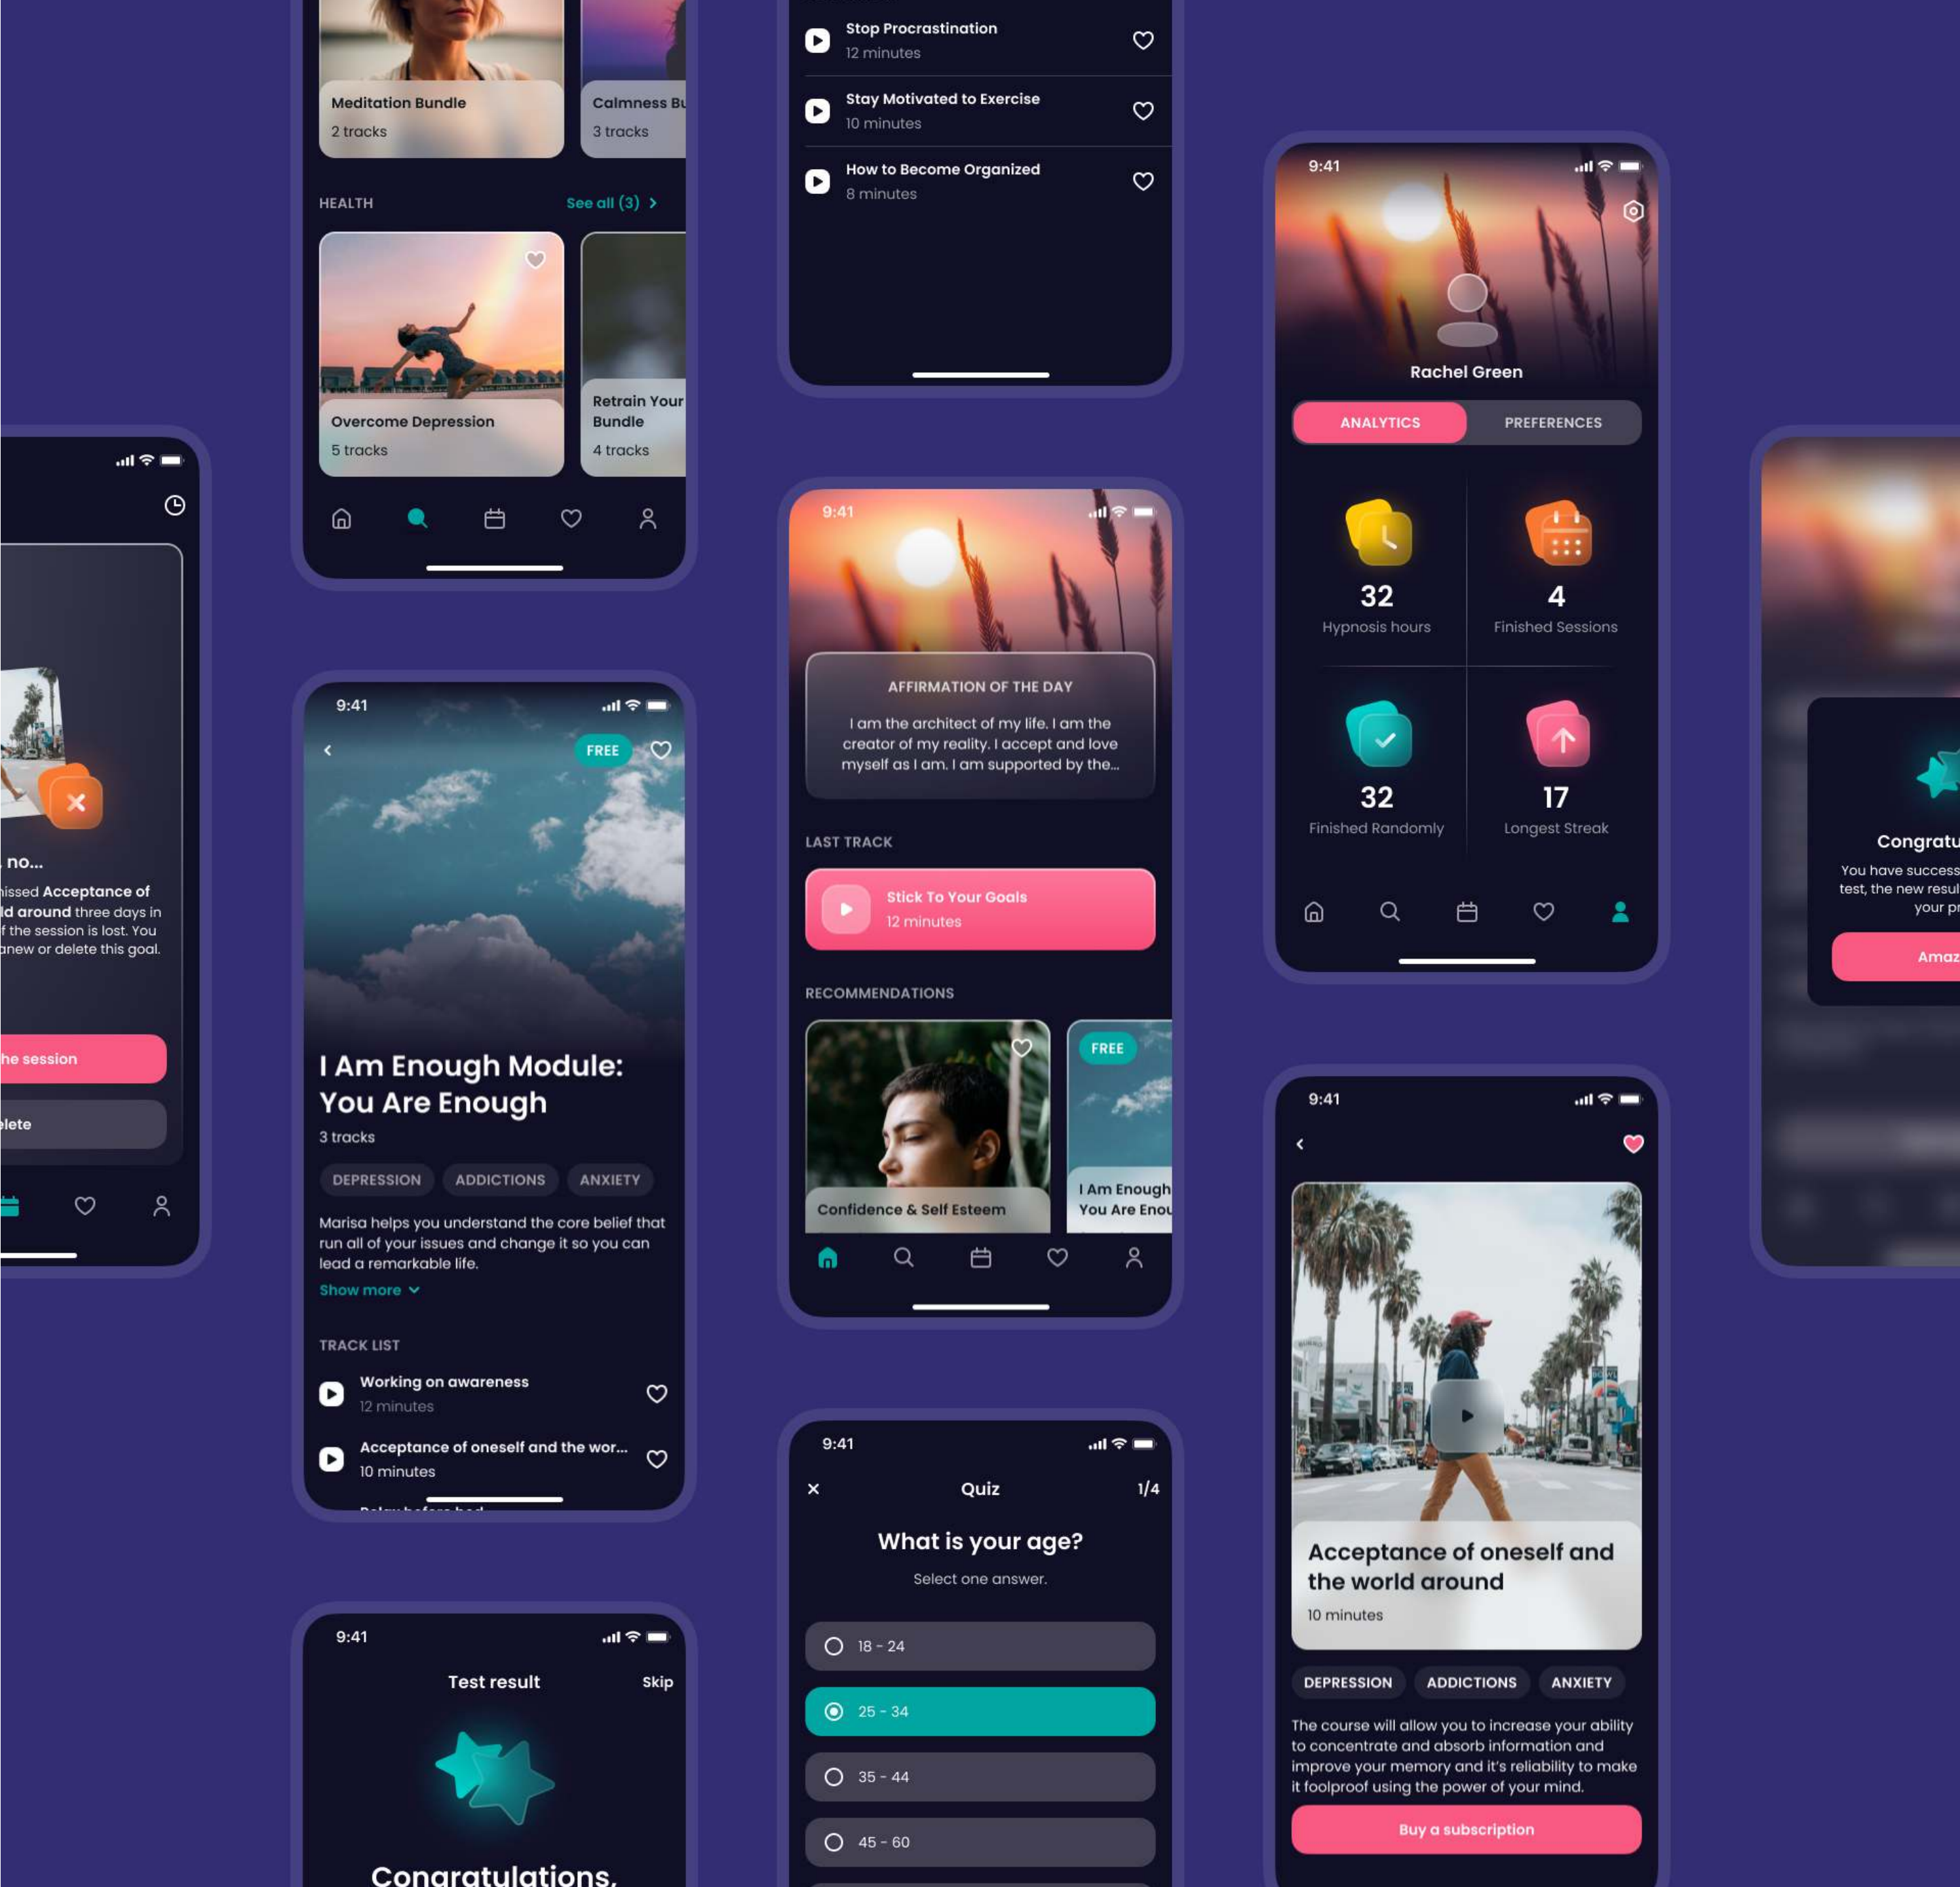

Santa Monica, CA, USA

Industry

Startup, Well-being, Mental Health, Coaching

Services we provided

- Branding
- UX design
- UI design
- Design System

What our clients say 😎

"Eugene and Valentyn were able to understand our expectation and meet our stringent timeline without compromising on quality, good job by team Axicube."

Satya Ganni

Founder and CEO at Applozic, CloudFrame

"I am glad to cooperate with Valentyn. It is rare to find a niche professional who is able to think deeper and see more even when they have to look beyond their experience. I definitely recommend."

Dmitry Obuhov

Co-Founder, CEO at Bimp

"Their attention to detail and creative skills produced the designs we were looking for."

Marius Prodana

Product Director, SIMAVI

PROCESSES

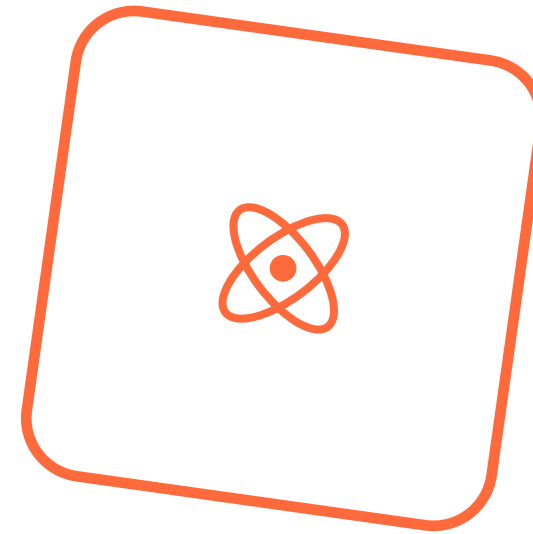

Discovery and Research

We will align our vision, go deeper inside your product and business, and understand goals & expectations. Also, we define the main problems and features for the MVP.

RESULTS

- Competitor analysis report
- High-level features backlog (based on the discovered goals and problems)
- UI concept for the 1-2 main pages

UX Strategy

The goal is understand a context of usage your app: what and when your users need. And simulate app functionalities to make potential problems visible more accurately. It's a great way to improve UX and avoid mistakes. Also, you will get a whole picture of future product functionality.

RESULTS

- Information Architecture
- User Flows
- Wireframes
- Screens Map

UI design & Design System

UX/UI is a complex app design service. We provide stunning UI, so your business will prosper significantly. Also, we provides Design System for developers: so that the implementation will be smooth and quick.

RESULTS

- Visual and UI design
- Screens Map based on the previous step
- UI Kit or Design System
- Interface animation samples

Our designs are **Easy-to-implement** and **Ready-to-go** into development immediately without any delays or questions.

We provide solutions that fit your client's budget & expectations and **match your tech requirements**.

All our experience from cooperation with Top Software Development teams will be at your service 💪
